Digital Display

Motorsport or public transport digital driving guide-Malaysia Patent Pending

We Make Things Alive™

Funfiek focuses on Making Thing Alive™ in its product innovation. The effectiveness is measured thru direct profitability contribution and or cost saving to its customers.

Funfiek Lean design approach provides flexibility and or comprehensive development services dedicated to maximize the return of your innovation. We are ready to complement your needs anything from product customization and proliferation, to undertake specific engineering task, to develop or co-develop original engineering concepts.

Funfiek Lean Manufacturing approach works greatly in the vertical integration to ensure the products cost competitiveness, speedy turnaround time and world class product quality. Head-quarters in Malaysia, the knowledgeable team deploys the product lifecycle management seamlessly across the countries in the far east.

The cornerstone of our success is combining our originality in development and our extensive manufacturing experience with your specific vision.
